

## Proper Application of Barrel Sealing Wax

### Procedure:

- Mark area where leakage occurs with pencil.
- Use torch, heat gun, or blow dryer to heat/dry area.
- Sand leakage area with rough sand paper.
- Using a piece of barrel wax, as required, bring to desired degree of softness by kneading in your hand.
- Heat putty knife, then work putty into area.
- Put wine/brandy/vinegar into barrel.
